

**ASSOCIATED RACK CORPORATION**

Quality, Custom Designed

RACKS, BASKETS, CARTS, AND ALL METAL FABRICATION

Protective Coatings

Plastisol, Halar, Teflon, Polyethylene

Supplies and Equipment

Anode Baskets, Anode Bags, Titanium Fixtures, Auxillary Anodes

For Plating, Powder Coat, E Coat, Paint, Printed Circuits,  
Vacuum Deposition, Anodizing, and Manufacturing

*"The Right Start to a Perfect Finish"*

## **Design Capabilities**

ARC "Sales Engineers", are knowledgeable and experienced in processing methods and can design custom tools to optimize your equipment's capabilities. In combination with maximizing space utilization and loading/unloading efficiencies, ARC will respond to your request with a precision-built prototype for testing. Upon your approval, ARC will commit to a firm delivery date.

## **Manufacturing Facilities**

With production facilities strategically located in 7 major U.S. industrial centers, your product is manufactured at an ARC facility near you. On those occasions when you need delivery "yesterday", we have the flexibility to produce at several of our facilities or shift additional personnel to the ARC plant nearest you. Our centralized purchasing system means that there are materials readily available at all locations

## **Services**

Providing you with personalized service is our highly-regarded sales force. "Field engineer" is a better description. They are knowledgeable of processes, metals, and the problems you may encounter. They are not hesitant to climb onto your equipment to get a close look at a problem area or to take some needed measurements. And, they don't drive sedans. They'll arrive at your plant in a pick-up truck so they can personally transport your parts and items to be rebuilt. This can save valuable time and shipping costs. It won't be long before you realize "an ARC sales engineer is a person you can rely on."

## **Value**

Thousands of companies, who are now our customers, prove that ARC means value. When you contact your nearest ARC location you can begin to experience the combination of service, quality, and value as only we provide. Then you can relax with the peace of mind knowing that you have selected the best.

**SS Custom Designs**

**SS Spin Drying**

**CPVC Stackable Storage**

**Plastic Dipping**

**Inconel Heat Treat**

**Expanded Steel Skid Lift**

**Expanded Steel Stackable**

# Additional Tooling and Designs

**Silver Graphite Anodic Interface  
For Rotating Internal Anode**

**Machined Teflon with Neoprene  
Gaskets for Selective Phosphate**

**Rectifier Buss Bars**

**Optical Lens Coating Carrier**

**Phosphating**

**Vacuum Coating Headlight Housings**

**Vacuum Coating Plumbing**

# Additional Supplies

All Sizes of Anode Bags

Air Drying Plastisol

Masking Caps and Plugs

Belke Replaceable Tip Components

Barrel Dangles

Masking Tapes

Individual "Hexies" Floating  
Bath Blankets

Castings

## ARC Magnets "attract" attention

These powerful magnets allow you to safely retrieve steel parts from plating tanks and barrels.

Each unit is a standard 48" overall length and coated with acid resistant Plastisol.

Hooks and Wire Forms

Tank Magnets
